Fajla Rabby

Full-Stack Developer (MERN)

+8801307495864 | fajlarabby.dev@gmail.com | Dhaka-1100, Bangladesh
[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Objective
Enthusiastic undergraduate with expertise in the MERN stack, capable of designing, developing, and deploying full-stack web applications. Skilled in integrating frontend interfaces with backend services to deliver end-to-end solutions. Passionate about building scalable applications while expanding technical proficiency.

Education
B.Sc. in Psychology, Dhaka College, Dhaka, Bangladesh | 2023 – Present

Achievements
Programming Hero **Blackbelt**(2025),

Skills
Technical Skills:
- **Languages & Frameworks:** JavaScript (ES6+), TypeScript (comportable), Node.js, Express.js, React.js, Redux
- **Frontend:** HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design
- **Databases & Backend:** MongoDB, Firebase, REST APIs, JSON
- **Tools & Platforms:** Git, GitHub, VS Code, npm, Postman, Deployment

Interpersonal Skills:
- Teamwork & Collaboration
- Problem Solving
- Adaptability & Continuous Learning

Projects
1. MediMurt Hub | Multi-Vendor Medicine buying and selling platform. | [Live link](#) | [GitHub (Client)](#) | [GitHub (Server)](#)
- **Role-Based Access Control:** Separate dashboards for Admin, Seller, and Buyer with customized functionalities.
- **Secure Payment Integration:** Implemented Stripe for seamless online transactions and invoice generation.
- **Dynamic Dashboard & APIs:** CRUD operations, advertisement, user, medicine, payments, medicine category management and sales report.

2. Car Rental | A web app for booking and managing car rentals. | [Live link](#) | [GitHub (Client)](#) | [GitHub (Server)](#)
- **Car Management:** Authenticated users can add, update, and delete cars with real-time availability and booking counts.
- **Booking System:** Comprehensive booking system with options to book, view, modify, and cancel reservations.
- **Secure Authentication & Authorization:** Implemented Firebase authentication with email/password and Google sign-in for secure user access.

3. Recipe Book | Recipe book web app showcasing ingredients, steps, and instructions. | [Live link](#) | [GitHub (Client)](#) | [GitHub (Server)](#)
- **Recipe Management:** Users can browse top recipes from the MongoDB database and also add their own recipes to manage their personal collection.
- **Enhanced User Experience:** Mobile-first responsive design, dark/light mode toggle, animations, and toast notifications for an improved user experience.
- **Secure Authentication & Authorization:** Implemented Firebase authentication with email/password and Google sign-in for secure user access.

Certificate
- Complete Web Development - Programming Hero (Jan 2025 - Aug 2025) | [Certificate](#)
- Hackathon Participation – Technovation'25 | [Certificate](#)

Languages
Bangla (Native), English (Elementary proficiency), Hindi (Limited working proficiency)
